Election/Restriction

Applicant's election of Group I, Claims 1-11 in Paper No. 8 is acknowledged. Upon further reconsideration by the Examiner
5 Groups I and III (claims 1-11 and 17-20) are considered a single invention.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse

10 The species (e.g. peptides) are distinct because they are of
different proteins and/or different protein coding regions, which
differ from the other in amino acid composition. The peptides
appear to be immunologically and antigenically distinct, as well.

15 Applicant is required under 35 U.S.C. § 121 to elect a single
species, even though this requirement is traversed.

20 Should applicant traverse on the ground that the species are
not patentably distinct, applicant should submit evidence or
identify such evidence now of record showing the species to be
obvious variants or clearly admit on the record that this is the
case. In either instance, if the examiner finds one of the
inventions unpatentable over the prior art, the evidence or
admission may be used in a rejection under 35 U.S.C. § 103 of the
other invention.

A telephone call was made to Ms. Patrea L. Pabst on July 19, 1993
to request an oral election to the above restriction requirement,
but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Anthony C. Caputa whose telephone number is (703) 308-3995.
